#### 25.2.5.2 Internet Sustained Bandwidth Ethernet Port Service (InSBEP)

Contractor shall provide Internet Sustained Bandwidth Ethernet Port (InSBEP) Service. Contractor shall provide an Internet port configuration that allows Customers to select a monthly minimum bandwidth commitment. Customers then pay an additional incremental usage charge for sustained usage above the monthly minimum bandwidth commitment. Service shall allow Customers to "burst" up to the full capacity of the InSBET when needed. This service shall be provisioned in conjunction with a Customer owned IP enabled routing device.

#### **Bidder understands the requirements and shall meet or exceed them? Yes**

##### 25.2.5.2.1 InSBEP Minimum Bandwidth Commitment

Contractor shall provide InSBEP Minimum Bandwidth Commitment port configuration that allows Customers to select a monthly minimum bandwidth commitment as described in Table 25.2.5.2.2.a

**Bidder understands the requirements and shall meet or exceed them? Yes**

25.2.5.2.2 InSBEP Additional Incremental Usage Charge for sustained Usage Contractor may charge an incremental usage charge for sustained usage above the minimum bandwidth commitment speed identified.

Contractor shall calculate sustained usage as follows:

1. Poll Access IP enabled routing device every five minutes and collect two readings (average Octets in and Octets out over the five minute period);
2. Both averages become data points (a total of 17,280 in a 30-day bill cycle) that are tracked over the Customer's monthly billing cycle;
3. All 17,280 data points are ranked in ascending order;
4. Discard the highest five percentiles (or 864 measurements in a 30-day bill cycle); and
5. The remaining ninety-fifth percentile is the Sustained Usage value for billing purposes.

**Bidder understands the requirements and shall meet or exceed them? Yes**

### 25.2.5.3 InSBEP with Managed IP Enabled Routing Device Service (InSBEPM)

Contractor shall provide Internet sustained Bandwidth Ethernet Port with Managed IP Enabled Routing Device Service. Contractor shall provide a port configuration that allows Customers to select a monthly minimum bandwidth commitment. Customers then pay an additional incremental usage charge for sustained usage above the monthly minimum bandwidth commitment.

Service shall allow Customers to "burst" up to the full capacity of the InSBET when needed.

**Bidder understands the requirements and shall meet or exceed them? Yes**

The service shall include a Contractor owned, maintained and managed IP enabled routing device.

**Bidder understands the requirements and shall meet or exceed them? Yes**

The Contractor's managed IP enabled routing device service shall include proactive Customer notification as identified in the Service Level Agreements.

**Bidder understands the requirements and shall meet or exceed them? Yes**

The Contractor shall provide customers full read only access to the managed router or managed IP enabled routing device.

**Bidder understands the requirements and shall meet or exceed them? Yes**

If the Contractor provides LTE backup services for Managed Equipment the Contractor shall use current CALNET Cellular providers. All Bidders are required to indicate below that they understand the requirement regardless of their intent to provide LTE backup services.

**Bidder understands this requirement and shall meet or exceed it? Yes**

**25.2.5.3.1 InSBEP Minimum Bandwidth Commitment**

Contractor shall provide InSBEP Minimum Bandwidth Commitment port configuration that allows Customers to select a monthly minimum bandwidth commitment as described in Table 25.2.5.3.a. This service shall include a Contractor owned, maintained and managed IP enabled routing device with service commitments as described in the Bidder's response to Section 25.2.5.3.

Contractor shall calculate sustained usage as follows:

1. Poll Access IP enabled routing device every five minutes and collect two readings (average Octets in and Octets out over the five minute period);
2. Both averages become data points (a total of 17,280 in a 30- day bill cycle) that are tracked over the Customer's monthly billing cycle;
3. All 17,280 data points are ranked in ascending order;

4. Discard the top 5% (or 864 measurements in a 30-day bill cycle); and
5. The highest remaining data point is the sustained usage value for billing purposes.

**Bidder understands the requirements and shall meet or exceed them? Yes**

Committed SLA objectives are minimum parameters which the Contractor shall be held accountable for all rights and remedies throughout Contract Term.

**Bidder understands this Requirement and shall meet or exceed it? Yes**

### 25.6.3 Methods of Outage Reporting: Customer or Contractor

There are two methods in which CALNET service failures or quality of service issues may be reported and Contractor trouble tickets opened: Customer reported or Contractor reported.

The first method of outage reporting results from a Customer reporting service trouble to the Contractor's Customer Service Center via phone call or opening

of a trouble ticket using the on-line Trouble Ticket Reporting Tool (SOW Business Requirements Section G.10.4, Trouble Ticket Reporting Tool (TTRT)).

The second method of outage reporting occurs when the Contractor opens a trouble ticket as a result of network/system alarm or other method of service failure identification. In each instance the Contractor shall open a trouble ticket using the Trouble Ticket Reporting Tool (SOW Business Requirements Section G.10.4) and monitor and report to Customer until service is restored.
