Bidder understands the requirements and shall meet or exceed them? Yes

25.2.5.2.2 InSBEP Additional Incremental Usage Charge for sustained Usage

Contractor may charge an incremental usage charge for sustained usage above the minimum bandwidth commitment speed identified.

Contractor shall calculate sustained usage as follows:

1. Poll Access IP enabled routing device every five minutes and collect two readings (average Octets in and Octets out over the five minute period);
2. Both averages become data points (a total of 17,280 in a 30-day bill cycle) that are tracked over the Customer's monthly billing cycle;
3. All 17,280 data points are ranked in ascending order;

4. Discard the highest five percentiles (or 864 measurements in a 30-day bill cycle); and
5. The remaining ninety-fifth percentile is the Sustained Usage value for billing purposes.

Bidder understands the requirements and shall meet or exceed them? Yes

25.2.5.3 InSBEP with Managed IP Enabled Routing Device Service (InSBEPM)

Contractor shall provide Internet sustained Bandwidth Ethernet Port with Managed IP Enabled Routing Device Service. Contractor shall provide a port configuration that allows Customers to select a monthly minimum bandwidth commitment. Customers then pay an additional incremental usage charge for sustained usage above the monthly minimum bandwidth commitment. Service shall allow Customers to "burst" up to the full capacity of the InSBET when needed.

Bidder understands the requirements and shall meet or exceed them? Yes

The service shall include a Contractor owned, maintained and managed IP enabled routing device.

Bidder understands the requirements and shall meet or exceed them? Yes

The Contractor's managed IP enabled routing device service shall include proactive Customer notification as identified in the Service Level Agreements.

Bidder understands the requirements and shall meet or exceed them? Yes

The Contractor shall provide customers full read only access to the managed router or managed IP enabled routing device.

Bidder understands the requirements and shall meet or exceed them? Yes

If the Contractor provides LTE backup services for Managed Equipment the Contractor shall use current CALNET Cellular providers. All Bidders are required to indicate below that they understand the requirement regardless of their intent to provide LTE backup services.

Bidder understands this requirement and shall meet or exceed it? Yes

25.2.5.3.1 InSBEPM Minimum Bandwidth Commitment

Contractor shall provide InSBEPM Minimum Bandwidth Commitment port configuration that allows Customers to select a monthly minimum bandwidth commitment as described in Table 25.2.5.3.a. This service shall include a Contractor owned, maintained and managed IP enabled routing device with service commitments as described in the Bidder's response to Section 25.2.5.3.

Contractor shall calculate sustained usage as follows:

1. Poll Access IP enabled routing device every five minutes and collect two readings (average Octets in and Octets out over the five minute period);
2. Both averages become data points (a total of 17,280 in a 30- day bill cycle) that are tracked over the Customer's monthly billing cycle;
3. All 17,280 data points are ranked in ascending order;
4. Discard the top 5% (or 864 measurements in a 30-day bill cycle); and
5. The highest remaining data point is the sustained usage value for billing purposes.

Bidder understands the requirements and shall meet or exceed them? Yes

25.3 NETWORK DISASTER/OPERATIONAL RECOVERY

25.3.1 Telecommunications Service Priority (TSP) Program

When applicable, the Contractor shall comply with the Telecommunications Service Priority (TSP) Program, a Federal Communications Commission (FCC) mandate for prioritizing service requests by identifying those services critical to National Security and Emergency Preparedness (NS/EP) and be in compliance with all related CPUC and FCC requirements.

Bidder understands the requirements and shall meet or exceed them? Yes

25.4 DISTRIBUTED DENIAL OF SERVICE MITIGATION SERVICES

The Contractor shall provide a network based Distributed Denial of Service (DDoS) mitigation service, in support of Contractor's Internet services. All hardware/software necessary to provide service shall reside in the Contractor's network and shall be maintained, monitored and supported by the Contractor. Mitigation shall occur in the Contractor IP Network before traffic reaches Customer edge router. Contractor shall establish User and Entity Behavior Analytical (UEBA) traffic patterns to minimize false positives during the detection/mitigation process and perform periodic "tuning" of normal traffic patterns established. The Contractor shall analyze, identify, report and alert on anomalies in Customer traffic under DDoS attacks. Upon detection of a DDoS attack, Contractor shall reroute traffic to a network based mitigation center where DDoS attack packets are identified and dropped. Valid packets shall be routed to the Customer edge router. Upon Contractor determination that the DDoS attack has subsided, Contractor shall restore the normal routing of Customer traffic.

The Bidder's DDoS solution shall mitigate volumetric, protocol or resource, and application layer (Layers 3, 4 & 7) attacks. Bidder's DDoS offering shall defend against the following threats/attacks at a minimum:

1. Network flood attacks (SYN, SYN-ACK, TCP, UDP, IP, ICMP, etc.);
2. Address, port scanning and sniffing attacks;
3. DNS attacks;
4. Web application attacks (HTTP flood attacks, etc.); and,
5. Protocol abuse attacks.

Bidder understands the requirements and shall meet or exceed them? Yes

25.4.1 DDoS Initiation

The Contractor shall support the initiation of DDoS mitigation described below:

1. Customer identifies the DDoS attack and initiates the mitigation; or,
2. Contractor identifies the DDoS attack and Customer authorizes the mitigation.

Bidder understands the requirements and shall meet or exceed them? Yes

25.4.2 DDoS Activities

The Contractor shall perform the following activities at a minimum:

1. Monitoring of Customer traffic patterns;
2. Establish network traffic baselines;
3. Detection of Customer traffic anomalies;
4. Scrubbing of Customer traffic by dropping DDoS attack packets;
5. Perform detection and anomaly analysis;
6. Develop and provide access to a strategy for identifying and mitigating real time attacks;
7. Issuance of email alert and a verbal person-to-person telephone call to authorized users within 15 minutes when an anomaly or attack is detected;
8. Issuance of email alert and a verbal person-to-person telephone call to authorized users within 15 minutes of when mitigation services commence; and,
9. Analyze attack patterns throughout Contractor IP backbone and alerting authorized users of IP threats, provide authorized users the information via secure portal for addressing/mitigating IP threats.

Bidder understands the requirements and shall meet or exceed them? Yes

25.4.2.1 U.S. Based DDoS Mitigation Services Waiver

The provisions detailed in eVAQ General Provisions Section 92, U.S. Based Services, will not apply to the Contractor's DDoS mitigation efforts under the following conditions:

1. Attacks where malicious traffic originates outside of the U.S. and is mitigated outside of the U.S.;
2. Contractor personnel located outside the U.S. may access public information (including Public IP address information) only to the extent necessary to mitigate a DDoS attack; and,

3. CPNI shall not be provided to individuals outside of the U.S.

Bidder understands the Requirement and shall meet or exceed it? Yes

25.4.3 DDoS Detection and Mitigation Web Portal and Reporting

Contractor shall provide a secure web based portal for authorized users. The Contractor's portal shall provide authorized users the following at a minimum:

1. A view of their traffic patterns;

Bidder understands the requirements and shall meet or exceed them? Yes

2. A view of the real time attack and mitigation strategy;

Bidder understands the requirements and shall meet or exceed them? Yes

3. IP threat alerts;

Bidder understands the requirements and shall meet or exceed them? Yes

4. Information for addressing and mitigating IP threats; and,

Bidder understands the requirements and shall meet or exceed them? Yes

25.4.3.1 DDoS Detection and Mitigation Reports

Contractor's portal shall provide authorized users access to the following reports at a minimum:

1. Traffic anomaly detection;

Bidder understands the requirements and shall meet or exceed them? Yes

2. TCP and UDP protocol summary; and,

Bidder understands the requirements and shall meet or exceed them? Yes

3. Top IP "talkers" summary.

Bidder understands the requirements and shall meet or exceed them? Yes

25.4.3.2 DDoS Detection and Mitigation Service

The Contractor shall offer the DDoS Detection and Mitigation Service detailed in Table 25.4.3.2.a.
