

IT POLICY LETTER

NUMBER:
ITPL 10-09

SUBJECT:
POWER MANAGEMENT AND SHUTDOWN
EMPHASIS: Reductions in energy consumption and greenhouse gas emissions

DATE ISSUED:
JULY 21, 2010

EXPIRES:
Until Rescinded

REFERENCES:
Government Code Section 11545
Information Technology Policy Letter 10-08
Management Memo 09-04 and the Standard Operating Efficiency Procedures
Executive Order S-03-10
State Administrative Manual, Sections 4819.2 and 4819.31

ISSUING AGENCY:
OFFICE OF THE STATE CHIEF INFORMATION OFFICER

DISTRIBUTION Agency Secretaries Department Directors
 Agency Chief Information Officers Department Chief Information Officers

PURPOSE To further the Legislative intent of the Global Warming Solutions Act (AB 32) and Government Code Section 11545(b)(3), the purpose of this Information Technology Policy Letter (ITPL) is to reduce energy consumption by state agencies¹ thereby reducing greenhouse gas emissions, and to minimize overlap, redundancy and cost in state operations by promoting the efficient and effective use of information technology (IT). In addition, this policy reinforces the intent of Management Memo 09-04 in applying energy efficient management practices during normal and emergency operations, and supports the compliance reporting requirement included in Executive Order (EO) S-03-10.

Specifically, this ITPL:

- Establishes a policy for California state government which requires power management and shutdown of desktop and laptop computing devices, thin client devices, printers, copiers, scanners, and monitors.
- Establishes a requirement of compliance reporting by departments.
- Defines exemptions to this policy.

POLICY Agencies shall implement power management practices on all desktop and laptop computing devices, thin client devices, printers, copiers, scanners, and monitors. During hours of normal operation, devices which are not in use for 30 minutes shall automatically go into an energy-saving mode.

¹ When capitalized, the term "Agency" refers to one of the state's super agencies such as the State and Consumer Services Agency or the Health and Human Services Agency. When used in lower case, the term "agency" refers to any office, department, board, bureau, commission or other organizational entity within state government. Within this ITPL, "agency" and "department" are used interchangeably.

Devices shall be shutdown at the end of the normal business day.

In addition, agencies shall fully implement power management software for desktop and laptop devices by December 31, 2010². Agencies shall also implement standby and shutdown practices for all other devices within the scope of this policy beginning December 31, 2010.

EXEMPTIONS

Any exemption to this policy must be approved in writing by the Agency Chief Information Officer (Agency CIO) or the department's Chief Information Officer (CIO). Exemptions are limited to:

- Devices which must remain in active mode to meet state operational needs. An example of a valid exemption would be a desktop computer and monitor utilized to manage batch programs 24 hours per day, seven days per week.
 - Facilities with electrical service bundled-in with facility lease contracts where state entities would not likely receive offsetting benefits from acquiring power management software. In this instance, compliance can be achieved through the use of standard operating systems functionality (e.g., Windows).
-

PROCEDURES

Consistent with the compliance reporting requirements included in EO S-03-10, Agency CIOs and CIOs shall include the energy reduction information with their Infrastructure Consolidation Program (ICP) Scorecard data. Information regarding ICP Scorecard reporting is provided in ITPL 10-08.

APPLICABILITY

This policy applies to all desktop and laptop computing devices, thin client devices, printers, copiers, scanners, and monitors used for California State government operations unless otherwise exempt.

DEFINITIONS

For this policy, the following definitions apply:

- "Power Management" is a feature of some electrical appliances, especially copiers, computers and computer peripherals such as monitors and printers, which turns off the power or switches the system to a low-power state when inactive.
 - "Shutdown" is turning the power off in a controlled manner.
 - "System standby" (aka "sleep mode") refers to a low power mode for electronic devices such as computers, televisions, and remote controlled devices. These modes save significant electrical consumption compared to leaving a device fully on and idle but allow the user to avoid having to reset programming codes or wait for a machine to reboot.
-

SAM CHANGES

The State Administrative Manual (SAM) Sections 4819.2, Definitions, and 4819.31, Basic Policy, will be updated to include the changes discussed in this ITPL. An advance copy of the SAM updates is included as Attachment A.

CONTACT

Questions concerning this policy should be directed via email to Carol Kelly, Project Director, Consolidation, Office of the State Chief Information Officer at carol.kelly@state.ca.gov. Information concerning power management software is available from the Department of General Services (DGS) at

² Or six months after the 2010-11 Budget has been enacted, whichever is later.

<http://www.dgs.ca.gov/pd/Programs/Leveraged/SLP/PowerManagementSoftwareContracts.aspx>. Information concerning energy efficiency rebates and incentives is also available from the DGS at <http://www.dgs.ca.gov/pd/Programs/Leveraged/SLP/PowerManagementSoftwareContracts.aspx>.

4819.2 DEFINITIONS

(Revised xx/10)

Power Management. A feature of some electrical appliances, especially copiers, computers and computer peripherals such as monitors and printers, which turns off the power or switches the system to a low-power state when inactive.

Shutdown. Turning the power off in a controlled manner.

System Standby. A low power mode for electronic devices such as computers, televisions, and remote controlled devices (aka "sleep mode"). These modes save significant electrical consumption compared to leaving a device fully on and idle but allow the user to avoid having to reset programming codes or wait for a machine to reboot.

Note: The new addition to SAM Section 4819.31 is item #11. Items #1 through 10 remain unchanged.

4819.31 BASIC POLICY

(Revised xx/10)

11. Agencies shall implement power management practices on all desktop and laptop computing devices, thin client devices, printers, copiers, scanners, and monitors. During hours of normal operation, devices which are not in use for 30 minutes shall automatically go into an energy-saving mode. Devices shall be shutdown at the end of the normal business day.

In addition, agencies shall fully implement power management software for desktop and laptop devices by December 31, 2010, or six month after the 2010-11 Budget has been enacted, whichever is later. Agencies shall also implement standby and shutdown practices for all devices within the scope of this policy beginning December 31, 2010.

Exemptions must be approved in writing by the Agency Chief Information Officer (Agency CIO) or the department's Chief Information Officer (CIO). Exemptions are limited to:

- Devices which must remain in active mode to meet State operational needs. An example of a valid exemption would be a desktop computer and monitor utilized to manage batch programs 24 hours per day, seven days per week.
- Facilities with electrical service bundled-in with facility lease contracts where state entities would not likely receive offsetting benefits from acquiring power management software. In this instance, compliance can be achieved through the use of standard operating systems functionality (e.g., Windows).
