FOR IMMEDIATE RELEASE
October 8, 2018

22 HOT TOPICS AT CALIFORNIA CYBERSECURITY SUMMIT
Protecting People, Data and Reputations

(Sacramento) From cloud security, to foreign hacking, cyberattacks have increased in both frequency and severity and touch more lives every day. No one is immune to the vulnerability of identity theft. And with more people wired to technology, defending against data breaches has become more critical than ever.

The *State of California Cybersecurity Education Summit 2018* **on October 9 at the Sheraton Grand Sacramento** will tackle 22 of the hottest topics in cybersecurity, from the weakest link in cybersecurity and how to configure your cloud to protect against threats, to real time incident and risk management and the future of cyber terrorism.

Up to 800 people in government, private industry and education are expected to attend the daylong *Summit,* presented by the California Department of Technology, California Governor's Office of Emergency Services, California Highway Patrol, California National Guard and California State University, Sacramento.

Guest speakers include Aaron Goldstein, a Director with Tanium's Endpoint Detection and Response Team who has nine years of Incident Response consulting and threat intelligence management, Craig Bowman who is the Vice President of Verizon's Advanced Solutions Division, Martin Minnich who is the Program Manager of the California Cybersecurity Institute, and Wendi Whitmore who is a Global Lead with IBM with 15 years of experience responding to and preventing critical security breaches, conducting forensics and leading global services teams. Scott Young, the President of synED and California Cyberhub is also speaking about providing results-based technology and operational solutions to higher education and fortune 100 companies for more than 25 years.

The summit schedule is located on the State of California Cybersecurity Education Summit 2018 website. For media inquiries, contact Sharon Ito at 916-278-6273 or email sharon.itowarren@csus.edu.
