SUBJECT: MIDDLE-MILE BROADBAND INITIATIVE REPORT – NOVEMBER 2024

Dear Senator Wiener, Senator Bradford, Assemblymember Gabriel and Assemblymember Boerner,

In accordance with Provision 5 of Item 7502-001-0001 of Chapter 35, Statutes of 2024 (Senate Bill 108), the California Department of Technology (CDT) submits this report on the Middle-Mile Broadband Initiative (MMBI).

This report presents a detailed breakdown of the standalone California Department of Transportation (Caltrans) projects planned as part of the MMBI, including the following metrics:

1. **Locations** by Caltrans district, county, MMBI region, legislative district and right-of-way.
2. **Costs** by fiscal year and funding source, with projected dates for encumbrance and expenditure of project funds.
3. **Timelines** to start and end construction, with projected activation dates.
4. **Approved or pending last-mile projects** that anticipate connection to the middle-mile network project, identified by program (i.e., the Broadband, Equity, Access, and Deployment (BEAD) program; Federal Funding Account (FFA) program; California Advanced Services Fund (CASF) program; or other federal or state broadband program).

In addition to details on standalone Caltrans projects planned for the MMBI—which account for approximately 825 miles of fiber construction—this report presents details on CDT’s planned use of Indefeasible Rights of Use (IRU)/leases, joint builds and purchase agreements for deployment of nearly 7,250 miles of the fiber network. These segments have been secured through the Request for Innovative Ideas (RFI²) procurement process.

Collectively, the data on Caltrans’ MMBI projects and the data on the RFI² projects present the most complete picture of the MMBI network.

A note on terminology

The MMBI uses the following terms to describe project activity:

- **Pre-construction** includes design, engineering and permitting activities.
- **Installation** includes conduit installation, vault placement, fiber pulling, splicing, hub placement, power connection and electronics installation.
- **Ready-to-connect** status means the network service center is established, and network testing confirms the segment is operational and secure.

Middle-Mile Broadband Network Project Status

To maintain alignment with the terminology stated in Provision 5 of Item 7502-001-0001 of Chapter 35, Statutes of 2024 (Senate Bill 108), the following terms are used interchangeably in this report:

- Construction and installation.
- Activation and ready-to-connect.
- Projects, routes and segments.

Throughout this report, start dates prior to September 30, 2024, are actual start dates; dates after September 30, 2024, are projected dates. Caltrans and RFI² partners plan to complete all projects by December 31, 2026. CDT expects to begin network activation by January 2027. Activation or ready-to-connect dates are contingent on completion of hubs and electronics, as well as CDT securing an Operations Third-Party Administrator.

Locations and Timelines: Locations by Caltrans District, County, MMBI Region, Legislative District and Right-of-Way, and Timelines to Start and End Construction, with Projected Activation

Details on MMBI’s “timelines to start and end construction, with projected activation dates” are included in the following sections, Appendix A (Caltrans’ standalone projects) and Appendix B (the MMBI segments to be completed through RFI² partnerships).

Standalone Caltrans Projects Planned as Part of the MMBI

CDT plans for Caltrans to build approximately 825 miles (comprised of about 770 miles of Caltrans build and nearly 53 miles for hub connection segments) of the MMBI’s statewide Middle-Mile Broadband Network (MMBN). Caltrans will also install an anticipated 132 network hubs (which are needed approximately every 50 miles to house network electronics) as standalone projects.

Caltrans’ fiber installations are divided into 82 standalone projects and subprojects within the State highway system right-of-way, across all Caltrans districts except Caltrans Districts 8 and 9.

As of September 30, 2024, Caltrans reports that about 60 fiber route miles are in the installation phase. Caltrans has completed pre-construction on approximately 200 fiber route miles, which currently are being finalized in scoping meetings with contractors. The remaining miles are in the pre-construction phase.

Caltrans also plans to complete pre-construction of approximately 110 hubs in 2025. Pre-construction efforts for the remaining hubs (about 22) will be led by CDT in collaboration with GoldenStateNet (GSN), the third-party administrator retained per SB 156 to manage the development, acquisition and construction of the statewide open access middle-mile broadband network.

The following map shows the general locations of the planned MMBN fiber routes and hubs. The table below provides a breakdown of standalone Caltrans project miles. The total estimated mileage includes hub entries (which have been reallocated from joint-build and lease miles to Caltrans construction miles). Appendix A provides further details on these projects by Caltrans district, county, MMBI region and legislative districts; the appendix also includes the total miles per project, as well as each project’s planned installation start and end dates.

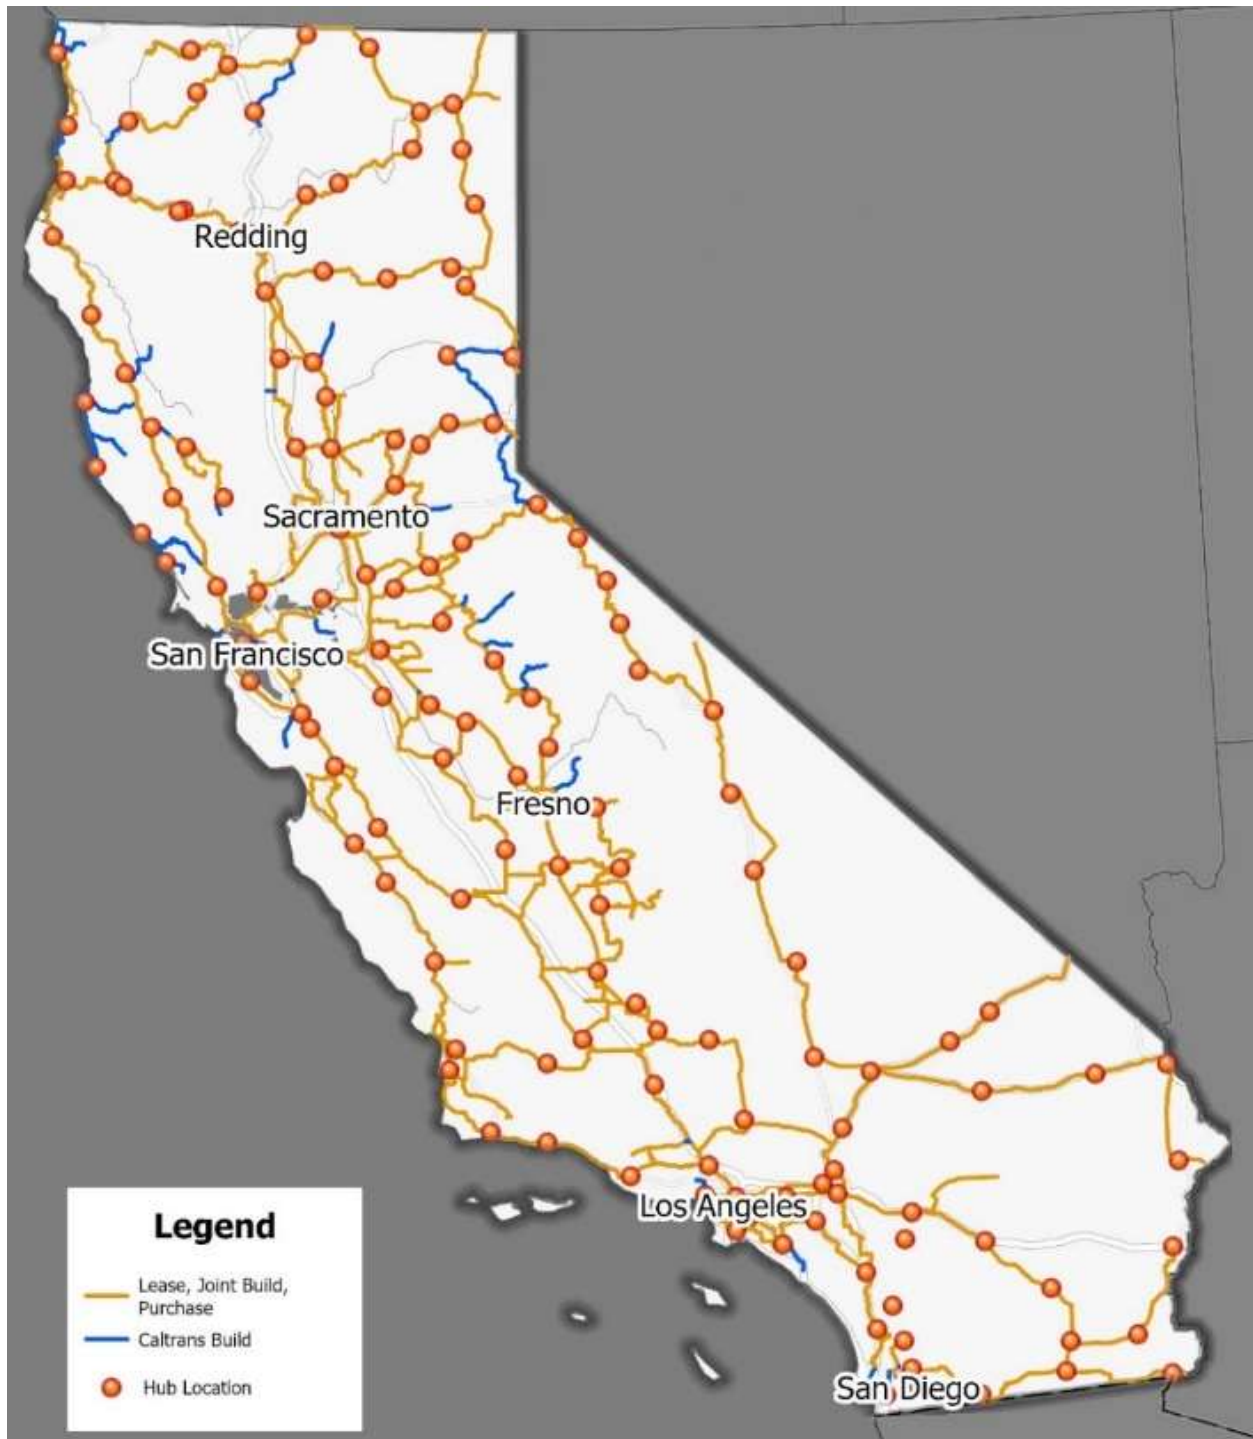

Figure 1: General Locations of MMBN Fiber Routes and Hubs

Table 1: Summary of Standalone Caltrans Projects by Caltrans District

Caltrans District	County*	MMBI Region	Congressional District	State Assembly District	State Senate District	Total Miles	Installation Start Date	Installation End Date
1	Del Norte, Humboldt, Lake, Mendocino	1	2, 4	2, 4	2	226.80	9/1/23	11/1/26
2	Lassen, Plumas, Shasta, Siskiyou	1	1, 3	1	1	86.10	3/11/24	11/1/26
3	Nevada, Sierra	1	1, 3, 5, 6, 7	1, 3, 4, 5, 6	1, 4, 8	138.86	9/7/24	10/1/26
4	Alameda, Contra Costa, Marin, Santa Clara, San Francisco, Sonoma	2	2, 4, 9, 10, 11, 12, 14, 16, 17, 18	2, 11, 12, 14, 15, 17, 18, 20, 23, 25, 26, 28	2, 3, 5, 7, 9, 10, 11, 13, 15	137.20	9/27/24	12/31/26
5	Santa Cruz	3	16, 19	28	15, 17	2.69	3/6/25	9/30/25
6	Fresno	3	20	8	12	25.72	1/15/25	6/30/26
7	Los Angeles	4	32, 42, 44	42, 44, 46, 69	24, 27, 33, 35	16.10	8/5/24	2/21/25
8 ¹	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
9 ²	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
10	Calaveras, Mariposa, Tuolumne	2	5	8	4	79.52	3/15/25	11/30/26
11	San Diego	5	40, 47, 48, 49, 50, 51, 52	75, 77, 78, 79, 80	14, 18, 39, 40	42.81	9/27/24	10/31/25
12	Orange	4	40, 47, 49	71, 72, 73, 74	37, 38	15.10	12/30/24	7/30/25
Additional miles for hub connection segments						52.70	TBD	12/31/26
Total						823.60		

* Counties in this table are only those with Caltrans construction miles. Counties with RFI² miles are reflected in the following section and in Appendix B.

RFI² Partner Projects Planned as Part of the MMBI

The MMBI has utilized IRUs (leases), joint builds and purchase agreements, where feasible, to optimize cost-effectiveness. As a result of these partnerships developed through the RFI² procurement process, CDT has secured approximately 7,250 miles of the network.

Of the approximately 7,250 miles, nearly 3,700 miles have been secured through leases from Boldyn Networks (Boldyn); CVIN; Digital 299/Trans Pacific Network (TPN); Lumen Technologies (Lumen); and Yurok Telecommunications (Ytel). About 2,990 miles have been secured through

¹ District 8 segments will be completed through RFI² partnerships.

² District 9 segments will be completed through RFI² partnerships.

joint-build partnerships between CDT and American Dark Fiber (ADF); Arcadian Infracom (Arcadian); Caltrans SR67 (SR67); Hoopa Valley Public Utilities District (Hoopa Valley); Lumen; Siskiyou Telephone Company (SiskiyouTel); Vero Networks (Vero); and Zayo Group (Zayo). Another 425 miles of MMBN fiber is being secured through the purchase of Digital 395 (D395). CDT anticipates finalizing approximately 135 additional miles of partnerships by the end of 2024.

CDT expects that more than 3,000 miles of fiber from RFI² partners will be in the installation phase by the end of 2024. Approximately 1,800 miles of the partners' segments are in the installation phase as of the date of this report.

Recent activity related to RFI² partnerships includes the following:

- In July 2024, CDT signed a lease agreement with Ytel covering approximately 47 miles in Northern California via two network segments from Orick to Crescent City. Ytel expects to start construction on this span in the 4th quarter of 2024.
- In August 2024, CDT signed a joint-build partnership with ADF to build more than 380 miles of MMBI network infrastructure across 13 counties.
- In September 2024, CDT signed a lease contract amendment with CVIN for approximately 160 additional miles through San Luis Obispo, Santa Barbara and Kern counties. With these additional segments, CVIN is now assigned about 2,700 miles of the network, half of which are new-build miles and half of which already exist.

The following table provides a breakdown of planned project miles by RFI² partners. Appendix B includes further details on the projects by Caltrans district, county, MMBI region and legislative districts, as well as total miles per segment and each segment's installation start and end dates. (Right-of-way data are not available for these segments; partners will have project miles both within and outside the right-of-way.)

Table 2: Planned MMBN Fiber Miles by RFI² Partner

Partner	County	MMBI Region	Congressional District	State Assembly District	State Senate District	Total Miles	Installation Start Date	Installation End Date
American Dark Fiber (Joint Build)	Imperial, Lake, Lassen, Los Angeles, Plumas, Riverside, San Bernardino, San Diego, Tehama, Ventura, Yolo,	1, 4, 5	1, 2, 3, 4, 23, 25, 26, 27, 29, 32, 41, 48, 51	1, 2, 3, 4, 34, 36, 38, 40, 42, 43, 47, 75, 78	1, 2, 3, 18, 19, 20, 27, 40	380.20	8/21/24	7/1/26

Costs by Fiscal Year and Funding Source, with Projected Dates for Encumbrance and Expenditure of Project Funds

The following tables present the MMBI's costs by fiscal year and funding source (i.e., American Rescue Plan Act (ARPA) State Fiscal Recovery Funds (SFRF) and the General Fund), with projected dates for encumbrance and expenditure (liquidation) of project funds.

In addition to these funding sources, in 2023, CDT was awarded grant funding of \$73 million by the National Telecommunications and Information Administration (NTIA). These funds were received pursuant to an Enabling Middle Mile Broadband Infrastructure grant application and are designated for specific segments of the network that CDT committed to build. The \$73 million NTIA grant, administered by the National Institute of Standards and Technology (NIST), required a \$118 million match from the General Fund appropriated for the MMBI project. CDT expects to complete its first partial drawdown of NTIA funds before the end of the 2024 calendar year. Appendix E presents a budgetary history of the MMBI.

Table 3: MMBI Encumbrances (Actual and Projected, 7/1/2021 – 12/31/2026)

	SFRF	General Funds	NTIA	Total
RFI ² Partnerships	\$1.329B	\$1.031B	\$0.030B	\$2.389B
Caltrans	\$0.604B	\$0.118B	\$0.042B	\$0.764B

Approved or Pending Last-Mile Projects that Anticipate Connection to the Middle-Mile Network

BEAD, FFA and CASF Programs

This section documents approved and pending last-mile projects that plan to connect to the MMBN and are funded by the California Public Utilities Commission's (CPUC) FFA and CASF programs. The window for applying to the BEAD Program has not opened as of the date of this report, so no BEAD projects are included in this report.

The FFA, CASF and BEAD programs are administered by the CPUC and are intended to fund last-mile broadband infrastructure projects to connect Californians:

- **FFA** is an approximately \$2 billion grant program for last-mile broadband infrastructure projects to connect unserved Californians in accordance with Senate Bill 156 (Chapter 112, Statutes of 2021).³
- The **CASF Broadband Infrastructure Grant Account** is part of the CASF program focused on broadband deployment to expand last-mile infrastructure.⁴
- **BEAD**, administered by the CPUC under NTIA's direction, is a \$1.86 billion grant program to expand last-mile high-speed internet access.⁵

Senate Bill 164 (Committee on Budget and Fiscal Review, Chapter 41, Statutes of 2024) mandates that CDT prioritize the deployment of MMBN segments that connect to last-mile projects funded through the FFA, CASF and BEAD grant programs. CDT plans to use a range of partnerships to enable the MMBN to reach these locations. As of October 1, 2024, all 105 of the qualifying and committed FFA applications that committed to using the MMBN are included in the planned MMBN.

The table below summarizes CPUC-provided data on FFA applications received, approved and recommended, as well as relevant CASF awards,⁶ and their anticipated commitments to connect to the MMBI's statewide network, as of October 1, 2024.

³ "Last Mile Federal Funding Account," CPUC, <https://www.cpuc.ca.gov/industries-and-topics/internet-and-phone/broadband-implementation-for-california/last-mile-federal-funding-account>.

⁴ "CASF Broadband Infrastructure Grant Account," CPUC, <https://www.cpuc.ca.gov/industries-and-topics/internet-and-phone/california-advanced-services-fund/casf-infrastructure-grant>.

⁵ "California Broadband Equity, Access, and Deployment (BEAD) Program," CPUC, <https://www.cpuc.ca.gov/industries-and-topics/internet-and-phone/broadband-implementation-for-california/bead-program>.

⁶ CASF Infrastructure Account awards in 2024.

Table 7: Total CASF and FFA Applications

Program	Total Number of Applications	Applications Committed to Connect to the MMBI	Applications NOT Committed to Connect to the MMBI	Pending Applications		Awarded
				Application Received	Approval Proposed (Recommended)	Awarded By Commission
CASF	6	1	5	0	0	6
FFA	483	107	376	415	9	59
Total	489	108	381	415	9	65

Appendix C includes supporting tables documenting:

- Total FFA applications and awards and CASF awards (by program).
- Total FFA applications and awards and CASF awards (by program) that have committed to connect to the MMBI.

Other Federal or State Broadband Programs

In addition to the FFA, CASF and BEAD programs, other federal and State funding programs (grants and loans) may support “approved or pending last-mile projects that anticipate connection to the middle-mile network.” These programs include the following:

- The federal **ReConnect Program**, administered by the U.S. Department of Agriculture, offers loans, grants and loan-grant combinations to facilitate broadband deployment in rural areas that do not have sufficient access to broadband.
- The federal **Tribal Broadband Connectivity Program (TBCP)**, administered by NTIA, supports the deployment of broadband infrastructure on tribal lands, including telehealth, distance learning, affordability and digital inclusion initiatives.

The following table summarizes information on ReConnect and TBCP awards to California applicants (based on information available to CDT as of September 12, 2024).

Table 8: Applications to Other Federal or State Broadband Programs

Program	Total Number of Applications	Total Number of Awards
ReConnect	8	6
TBCP	29	29
Total	37	35

Appendix D comprises a table documenting TBCP awards to California applicants, including projects with miles on an MMBN route or close to an MMBN segment.

Looking Ahead

The progress documented in this report reflects CDT's commitment to delivering on a critical element of the State's Broadband for All Action Plan. CDT will continue working toward the MMBI's goal of providing affordable, open-access middle-mile broadband infrastructure to enable last-mile networks throughout California.

If you have questions or would like to discuss this report, please contact me at liana.bailey-crimmins@state.ca.gov.

Respectfully,

Liana Bailey-Crimmins
Director
California Department of Technology

Appendix A: Caltrans Standalone Projects – Locations and Timelines

This appendix documents the standalone Caltrans projects planned within the State highway system right-of-way as part of the MMBI.

The following tables provide details on locations (i.e., each fiber segment’s Caltrans district, county, MMBI region, legislative district and total miles) and timelines (i.e., construction start and end dates).

Caltrans District 1

Caltrans Project	County ⁷	MMBI Region	Congressional District	State Assembly District	State Senate District	Total Miles	Installation Start Date	Installation End Date
0122000123	Del Norte	1	2	2	2	15.62	3/2/25	11/1/26
0123000045	Mendocino	1	2	2	2	10.83	9/1/23	7/22/24
0123000168	Mendocino	1	2	2	2	33.56	1/31/25	6/30/25
0123000169	Lake	1	4	4	2	6.02	12/3/24	11/1/26
0123000192	Humboldt (2)	1	2	2	2	35.13	1/1/25	11/1/26
0123000193	Mendocino (2)	1	2	2	2	29.55	1/7/25	11/1/26
0123000196	Mendocino	1	2	2	2	23.29	2/15/25	11/1/26
0124000184	Mendocino	1	2	2	2	20.96	3/2/25	11/1/26
0124000058	Del Norte (2)	1	2	2	2	1.89	2/4/25	11/1/26
0124000209	Mendocino (3)	1	2	2	2	49.96	1/7/25	11/1/26
Additional miles for hub connection segments						1.50	Installation planned in 2025	
Total						228.30		

⁷ A number in parentheses (#) indicates the number of subprojects in the county.

Caltrans District 2

Caltrans Project	County ⁸	MMBI Region	Congressional District	State Assembly District	State Senate District	Total Miles	Installation Start Date	Installation End Date
0222000100	Plumas	1	3	1	1	11.90	4/19/25	1/11/26
0223000009	Plumas	1	3	1	1	11.78	9/30/24	9/30/26
0223000017	Siskiyou	1	1	1	1	4.54	2/4/25	6/20/26
0223000030	Lassen, Plumas (2)	1	1, 3	1	1	17.86	5/24/25	9/30/26
0223000033	Siskiyou	1	1	1	1	36.89	5/24/25	6/20/26
0223000205	Siskiyou	1	1	1	1	3.14	2/4/25	6/20/26
Additional miles for hub connection segments						6.50	Installation planned in 2025	
Total						92.60		

⁸ A number in parentheses (#) indicates the number of subprojects in the county.

Caltrans District 3

Caltrans Project	County ⁹	MMBI Region	Congressional District	State Assembly District	State Senate District	Total Miles	Installation Start Date	Installation End Date
0322000266	Nevada, Sierra	1	3	1	1, 4	37.84	5/15/25	6/27/26
0322000270	El Dorado (3), Alpine, Placer	1	3	1	1, 4	43.66	5/15/25	6/27/26
0322000271	Butte	1	1	3	1	22.74	2/5/25	4/16/26

Appendix C: FFA and CASF: Last-Mile Projects That Anticipate Connecting to the MMBI

This appendix documents approved or pending last-mile projects funded by the FFA and CASF programs that anticipate connection to the MMBN. The window for applying to the BEAD program has not opened as of the date of this report, so no BEAD projects are included in this report.

The tables below present details on FFA applications and CASF awards as of October 1, 2024:

- Total FFA applications and awards and CASF awards (by program).
- Total FFA applications and awards and CASF awards (by program) that have committed to connect to the MMBI.

Table 9: Total FFA and CASF Applications (Summary)

Total Applications				Applicants Committed to Connect to the MMBI			Applicants NOT Committed to Connect to the MMBI		
Program	Total Number of Applications	Committed to Connect to the MMBI	NOT Committed to Connect to the MMBI	Application Received	Approval Proposed (Recommended)	Awarded by Commission	Application Received	Approval Proposed (Recommended)	Awarded by Commission
CASF	6	1	5	0	0	1	0	0	5
FFA	483	107	376	66	7	34	349	2	25
Total	489	108	381	66	7	35	349	2	30

Table 10: Total Applications That Have Committed to Connect to the MMBI (Summary)

Program	Total Number of Applications	Committed to Connect to the MMBI	Pending Applications		Awarded Applications
			Application Received	Approval Proposed (Recommended)	Awarded by Commission
CASF	6	1	0	0	1
FFA	483	107	66	7	34

Appendix D: Other Federal or State Last-mile Projects That Anticipate Connection to the MMBI

This appendix documents other federal and State funding programs that may support “approved or pending last-mile projects that anticipate connection to the middle-mile network.”

The following table identifies NTIA’s 29 total TBCP Round 1 awards to California applicants, including 11 with miles on an MMBN route or close to an MMBN segment.

Table 12: TBCP Awards to California Applicants

TBCP California Awardee	Date of Award	Program Funded	On MMBN Route	Completion Date ¹⁸
Yurok Tribe’s Telecommunication Corporation	8/22/2022	Infrastructure Deployment	Y	8/22/2023
Hoopa Valley Tribal Council	8/22/2022	Infrastructure Deployment	Y	8/22/2023

Bishop Paiute Tribe	6/1/2023	Planning, Engineering, Feasibility and Sustainability	N	5/31/2025

Appendix E: Budgetary History of the MMBI

The Administration partnered with the Legislature to prioritize broadband access through a portion of California’s share of ARPA funding. The 2021 Budget Act initially appropriated \$3.25 billion for the MMBI. Through subsequent Budget actions, \$3.873 billion in total funding has been appropriated to CDT for the MMBI. Of this total, \$2.4 billion is from ARPA funding, \$1.4 billion is from the General Fund and \$73 million is from middle-mile grant funding awarded by NTIA.

The following table provides a year-by-year summary of the MMBI’s budgetary activities. These activities have provided the necessary resources for the development and deployment of the MMBN, supporting the State’s goal to build a robust and equitable digital infrastructure:

- The 2021 Budget Act appropriated \$3.25 billion in ARPA SFRF funding to CDT for the MMBI.
- The 2022 Budget Act provided authority to swap approximately \$887 million of General Funds for ARPA funding and created budgetary authority to use any federal funds received.
- In 2023, the NTIA Enabling Middle-Mile Broadband Infrastructure grant program awarded CDT \$73 million in funding.
- The 2023 Budget Act appropriated an additional \$300 million from the General Fund for the MMBI.
- The 2024 Budget Act appropriated an additional \$250 million from the General Fund for the MMBI.

Table 13: Summary of MMBI Budgetary Activity (Fiscal Years 2021 – 2024)

Source	2021	2022	2023	2024	Total
ARPA SFRF	\$3.250B	(\$0.887B)	\$ -	\$ -	\$2.363B
General Fund	\$ -	\$0.887B	\$0.300B	\$0.250B	\$1.437B
NTIA	\$ -	\$ -	\$0.073B	\$ -	\$0.073B
Total	\$3.250B	\$ -	\$0.373B	\$0.250B	\$3.873B
